

The OmniFlex™ Corded AutoVac™ System

The OmniFlex™ AutoVac™ is an automated floor cleaning machine that's three-four times faster than mopping with one major difference: it actually removes the soils completely from the floor surface instead of spreading them around. Even more impressive, it rivals the performance of an autoscrubber — at a fraction of the cost!

A really fast, simple approach to clean, safe floors, this system is perfect for high speed cleaning of hard surface areas, such as hallways, cafeterias, lobbies, warehouses, fitness areas and more. It's as fast and effective as an autoscrubber without the added cost or complexity, making it perfect for building service contractors and facility managers alike.

PERFECT FOR:

Hallways
Lobbies
Cafeterias
Gymnasiums
Warehousing
Shop Floors
Healthcare
Retail

Daily floor cleaning
Stripping floors
Finishing floors

HIGHLIGHTS

- In tests performed by a major university, both the AutoVac and an autoscrubber removed over 99% of targeted soil, while a new microfiber mop removed only 51%.
- Certified by the National Floor Safety Institute (NFSI) for providing high traction.
- Cleans 16,000+ square feet an hour.
- Very simple to learn, use and maintain.
- Breaks down for light, easy transport.
- Perfect for applications where autoscrubbers are not practical.
- Available as a preconfigured package or as a simple, inexpensive add-on to existing OmniFlex systems.
- Includes all components necessary for a complete floor care system: cleaning, degreasing, stripping, waxing, and more.
- Easily expand capabilities by adding OmniFlex components and tools.
- Extremely easy to clean out, unlike many autoscrubbers which tend to trap soils in their recovery tanks.

Why is OmniFlex™ AutoVac™ Better?

Cleaning Effectiveness

In comparative tests performed by a major university, the AutoVac system removed up to 99.8% of targeted soil. This was slightly better than an autoscrubber, which removed up to 99.4%. A brand new microfiber mop only removed up to 50.9%. Ask your Kaivac representative for a full report.

High Performance

Independent performance tests show that users can clean more than 16,000 square feet per hour with the AutoVac system. Plus, most users won't have to dust mop before cleaning.

Low Cost of Ownership

For most users, the economics are the most compelling advantage. For starters, the initial purchase price of a complete AutoVac is 10-20% of an equivalently sized autoscrubber. And in many cases, it's less than the average annual maintenance costs of an autoscrubber. And, if you already own an OmniFlex Dispense-and-Vac or Spray-and-Vac system, this capability is available as a simple, low cost add-on. Plus, it's gentle on floors and finish, helping to prolong finish life and reduce refinishing options.

Easy and Inexpensive to Maintain

The OmniFlex AutoVac is very inexpensive and easy to maintain. That's because, with so few moving parts, very little can go wrong. And if it does, it's simple to troubleshoot and fix, unlike most cleaning equipment. Even better, virtually anyone can work on it. For example, nearly anyone can replace the AutoVac's squeegee blades in seconds, without any tools — unlike a standard drop mount squeegee. And in most cases, an entire unit can be reconditioned in minutes for less than the cost of a single service call.

Multiple Modes of Operation

Spread-and-Vac

Simultaneously dispense and spread cleaning solution with instant vacuum extraction.

Spread Only

Extended dwell time for heavy soil, disinfection, etc.

Vac Only

Vacuum removal of liquids, cleaning solution, stripper.

OmniFlex™ AutoVac™ Includes:

Available as a simple, inexpensive add-on to existing OmniFlex systems or as a complete preconfigured package.

AutoVac Add-on Kit

- Hitch Assembly for Trolley-Bucket
- 28 In. Drop Down Squeegee Head
- Drop Down Frame for Spreader Pad
- 5 Microfiber Pads

AutoVac Complete

- OmniFlex Trolley-Bucket
- OmniFlex Wet Vacuum
- AutoVac Add-on Kit (installed)

Optional

- 100 Ft. Electrical Cord

Vacuum Specifications:

Tank	10 Gallons (37,85 l)
Tank Cleanout	100% via Dump/Drain Hose
CFM	90 cfm (2548 l/min) for AC motor
Motor Lift	92 inches (233,7 cm) for AC motor
